SUMMARY

Information Technology undergraduate with practical experience in software development, web technologies, and databases. Proficient in Java, React, Node.js, SQL, and MongoDB, with a strong passion for building innovative and scalable technology solutions.

PROJECTS

Ceylon Galleria Art Gallery Management System

- Developed a web-based platform for Sri Lankan visual artist Janith Weerasinghe to digitize and centralize traditional art operations.
- Technologies : MongoDB, Express, React, NodeJs

Smart Campus Web Application

- Developed a web-based campus management system for handling student services, resources, and administrative operations.
- Technologies : SpringBoot, React

CyberTrust Java Web Application

- A full-stack Java web application built using Servlets and JSP, designed to provide a secure and modern online banking experience. The system allows users to register, log in, manage their accounts, and perform transactions such as money transfers and viewing transaction history.
- Technologies : Java, MySQL, TailwindCSS, JWT, JDBC

CERTIFICATIONS

- Amazon API Gateway for Serverless Applications
- C++ Essentials
- Generative AI Business Strategy and Solution Design
- Certificate of IFS AI
- Gemini Certified Educator
